

Did You Know?

**There were approximately
248,000 new cancer cases
in Canada in 2024!**

Scientists tend to speak in a heavy scientific language in order to preserve the meaning of the message

According to CCSN's survey on patient engagement, 62.5% wanted to serve on a Cancer Agency Board

87.5% of patients indicated that they would like skill training, as they are unprepared to debate against PHD researchers

CCSN's environmental scan found out that healthcare committees lack patients' representation and tools for patients' training

CCSN knows that knowledge is power!
